PROFILE

Software Engineer with commercial experience designing, developing, testing and supporting software applications and systems. Works across the software lifecycle, from requirements analysis and system design through implementation, testing, maintenance and production support. Holds a Bachelor of Software Engineering with Distinction.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, PHP, Java, SQL, HTML5, CSS3
Frameworks & Libraries	React, Laravel, Tailwind CSS
Databases	MySQL, Supabase
Tools	Git, GitHub, Vite, Claude Code, OpenAI Codex, GitHub Copilot
Engineering Practices	Requirements analysis, system design, database design, REST APIs, testing and debugging, maintenance and support, agile delivery, prompt engineering, UI/UX design

PROFESSIONAL EXPERIENCE

2026 – Present

Software Engineer • WebDev Technologies Limited

Lead developer on Peza Venue (pezavenue.com), a live venue-booking marketplace built with Laravel, Supabase, React and Tailwind CSS.

- Analyse requirements and translate them into features for listings, reservations, scheduling and availability.
- Design and develop features across the front end, back end and database layers.
- Test, debug and resolve defects so features perform to specification.
- Maintain and support the production system, shipping fixes and improvements.
- Collaborate with the engineering team in an agile workflow, using Git and GitHub for version control.

2025

Docufree Workflow Placement • Wiphan

- Managed document workflows, data entry and verification within enterprise systems.
- Performed quality assurance checks with consistent process compliance to maintain accuracy and data integrity.

2020 – 2022

Sales Assistant & Cashier • Pep Stores Zambia

- Customer service, cash handling and stock control in a fast-paced retail environment.

SELECTED PROJECTS

MARKETPLACE PLATFORM

Peza Venue

Live product

Laravel · Supabase · React · Tailwind CSS

Two-sided marketplace that replaces scattered listings and slow back-and-forth with discovery, comparison and booking requests, while venue providers manage listings, scheduling and availability.

DEVELOPER TOOLING

Database Visualizer

Live product Source code

React · TypeScript · Vite

Open-source schema explorer that renders tables and their relationships visually, replacing table-by-table reading of raw schema definitions during debugging and onboarding.

AGRITECH

Munda

Live product Source code

React · Vite · Tailwind CSS · Open-Meteo API · Node.js test runner

Crop intelligence application that combines location-aware weather data with explainable crop recommendations, giving non-technical growers plain-language guidance they can act on.

RECORDS MANAGEMENT

Student Information System

Source code

Laravel · PHP · MySQL · Tailwind CSS

Centralised system for student records, academic results and administrative dashboards, with validated data entry and role-based access control.

EDUCATION

Conferred 2026

Bachelor of Software Engineering (with Distinction)

Zambia University College of Technology

Studies completed December 2025; degree conferred 2026.
